Walkers are a valuable tool for people using it in the framework of a rehabilitation program for encouraging a flowing walking pattern, but it is also an extremely useful aid for a large number of elderly people or those with generally reduced mobility. In other words, it can be truly effective in preventing or significantly reducing the risk of falls, resulting in ever-growing social and welfare costs for the community.
01757 WALKER LIFT
Painted steel walker with four swivel castors, two of which are braking, and two adjustable handles. Height adjustable armrests using a gas piston operated by a lever control. This adjustment system allows simply and immediately adapting the aid to the build of the person.

Adjustable handles detail.

Height adjustment lever control system.

Detail of the protection grid against accidental hits.

08686 WALKER AF
Chromium-plated steel walker with four wheels (two swivel castors and two steering wheels with brakes). Complete with height-adjustable axillary supports. Comfortable padded seat. Dimensions 72 x 55 x 112-145 h (cm). Weight 12 kg. Capacity 150 kg.

08756 WALKER F
Chromium-plated steel walker with four wheels (two swivel castors and two steering wheels with brakes). Complete with height-adjustable padded top. Ergonomic adjustable handgrips with braking device. Dimensions 62 x 50 x 104-137 h (cm). Weight 10 kg. Capacity 110 kg.
“My grandmother broke her thigh-bone at home in August last year. As a result, she underwent emergency surgery and subsequently remained confined in bed for three months with assisted mobilization of the left limb in full extension. The care and attention that she received made the difference, as also did her high motivational level. However, the bedridden condition risked to worsen her general clinical picture. Eventually she returned home and started walking again using a walker that had two wheels on the front and two ferrules on the back.

This aid proved immediately very useful as it helped my grandmother to regain the necessary safety and confidence in walking, so much so that she was again able to go to the bathroom by herself, thus eliminating the use of diapers. From the moment she started walking again, she continued her rehabilitation program with greater vigour, with consequent steady, gradual recovery of self-sufficiency in all daily activities, renewed strength and gesture coordination.

On many occasions, my thought went to the walker that accompanies her throughout the day, stabilizes her posture, reduces the load on the lower limbs, allows the proper distribution of the same during walking, and gives her the security for interacting with the surrounding environment.

Now that we are at the end of March, we have started to go out as far as the hairdresser with another walker for outdoor use, that is to say, with four large wheels, equipped with brakes and a practical basket. We tried to replace the first walker with the one for outdoor use, but the latter is not so easy to use at home due to its bigger size. Ultimately, grandma decided to keep them both.

Eight months have now elapsed and everything is going well, but if she had started using this aid before falling, we would have avoided this dangerous experience.”

Davide Snidero, March 2015
WALKERS WITH TIPS

**XG9136 WALKER 9136**
Aluminum walker with 4 non-slip tips. It is foldable and height adjustable (76÷94 cm). Weight 3.6 Kg. Safety working load: 100 Kg

**01385 WALK-ON**
Adjustable folding walker, in painted aluminium. Non-slip tips and handgrips. It is height adjustable (78÷97.5 cm). Weight kg 3.6. Width 60 cm. Safety working load: 150 kg.

WALKERS WITH CASTERS

**01386 WALK-ON ROLL**
Adjustable folding walker, painted aluminium. Equipped with two front wheels with brakes. Non-slip tips and handgrips. Height 78÷97.5 cm. Weight 3.6 kg. Width 60 cm. Safety working load: 120 kg.

**42240 CHROMIUM-PLATED WALKER**
Adjustable folding walker, in chromium-plated steel, with two wheels and two non-slip tips. It is height adjustable (75÷103 cm). Width 65 cm. Weight 4.8 kg. Safety working load: kg 120.
ROLLATORS FOR ADULTS

01056 POLO PLUS
Aluminium folding adjustable walker, with four wheels, two of which have brakes. Non-slip seat, washable. Bag supplied. Height 74–92 cm. Width 67 cm. Weight 7.8 kg. Capacity 120 kg.

XRE010 JUMBO WALKER
Height adjustable steel walker with folding mechanism and four wheels, two of which have brakes and two swivelling. Supplied with non-slip seat, padded backrest and a practical bag. Height 75 to 93 cm. Width 76 cm. Weight 11.6 kg. Weight capacity 150 kg.
ROLLATORS FOR CHILDREN

01217 FIX
Multicolor, painted aluminium walker for children. Foldable and adjustable, with four wheels, two of which have brakes. Height 60-69 cm. Width 57.5 cm. Weight 6.2 kg. Capacity 100 kg.

01218 FOXI
Walker for taller children. Offers the same features and performance as model code 01217 (seat not included). Height 69-77 cm. Width 57.5 cm. Weight 6.3 kg. Capacity 100 kg.
CRUTCHES FOR ADULTS

02117
ECO 120 CRUTCHES
Aluminium crutch with one single adjustment (cm 72-95). Available in pairs. Weight: 0.61 kg
Max load: 120 kg. Sold in pair.

02118
ECO 120 PACK
Pack that contains 25 pairs of ECO 120 crutches - code 02117.

42050
SENIOR CRUTCHES
Crutches in aluminium, for adults with two adjustments. Available in pairs.
Height adjustment: 70 ÷ 98 cm
Forearm height: 17 ÷ 22 cm
Weight: 0.64 kg
Max load: 130 kg. Sold in pair.

42051
MAGIC SOFT CRUTCHES
Height-adjustable aluminium crutch for adults (75 - 98 cm). Handle made from soft material, for greater comfort under prolonged use. Available in pairs.
Weight: 0.6 kg
Adjustable height: 75 - 98 cm
Max. weight capacity: 130 kg. Sold in pair.

42052
ANATOMICAL MAGIC SOFT CRUTCHES
Height-adjustable, anatomical aluminium crutch for adults (75 - 98 cm). The handle is soft and anatomically designed to better fit right and left hand grip. Available in pairs.
