Therapy tables  
Configuration Guide

PRODUCT CODES EXPLAINED

The product code for Chinesport height-adjustable treatment tables is an “open code” that varies depending on the choice of various options available for each model. Each code position has a particular meaning, which corresponds with one or more features of the table.

It is also worth remembering that our Research & Development department is continually developing new options and accessories to achieve table configurations that increasingly meet the professionals’ individual requirements.

Details on our height-adjustable therapy tables

With an experience spanning over several decades, Chinesport offers a range of height-adjustable treatment tables for various uses and with different structural characteristics. Our offering covers various options including tables for examination, transfer, physical therapy, manipulation, specific treatment and massage. The frame is always sturdy, stable, with all rotary joints such as levers and hinges running on self-lubricating bushings to preserve them from wear and stop them creaking during movement. Finally, the base is open at the sides to allow for fitting hoisting equipment or medical equipment trolleys with overall dimensions up to 18 cm.

This is the classic range of examination and treatment tables consisting mainly of two sections, with a 68 cm-long head section that can be used as a backrest. The backrest can have positive and negative tilt adjustment: up to +70°/-20°. Height is adjusted via one of the most reliable motors available on the market. A hydraulic version is also available as an alternative. The frame is unique for its simplicity and harmonious design, which is protected by registered Community design. Some of our tables are also available with larger wheels so they can be used to transport patients. This configuration can be completed by fitting a set of safety siderails.

A major difference from the VISIT range is given by the head section length which is only 52 cm. For this reason, it cannot be used as a backrest, but it can be fitted with armrests to provide greater comfort for the patient when in prone position. These tables were developed for physiotherapy, osteopathy or for the so-called “Global Postural Re-education” method, and they can be configured with up to six sections to achieve different postural positions for the patient. There is also a model that can be arranged in a seated position for particular use in gynecology. Another difference from the VISIT range is that the head section has a greater tilt adjustment, i.e. positive tilt up to +85° and negative tilt up to -35°, plus the nose/mouth breathing hole is standard.

This range is an alternative to the classic ranges called VISIT and THER used for examinations, treatments and physiotherapy. In particular, the distinguishing feature in these tables is that during height adjustment the individual sections remain completely motionless. This makes them particularly suitable for smaller environments or to make the best use of available space, as well as to maintain the position chosen for exercises once the pulley therapy system has been set up. You can opt for a simplified base frame and configure the head section with a backrest that is 68 cm long, instead of a smaller section, 52 cm long, that can come with armrests. The second type of head section can have positive and negative tilt adjustment: up to +85°/-35°.

The product code for Chinesport height-adjustable treatment tables is an “open code” that varies depending on the choice of various options available for each model. Each code position has a particular meaning, which corresponds with one or more features of the table.

It is also worth remembering that our Research & Development department is continually developing new options and accessories to achieve table configurations that increasingly meet the professionals’ individual requirements.
Therapy tables  

Configuration Guide

Made in Italy

Large physical therapy tables that are up to two meters long and have a surface area measuring four square meters. The size and stability characteristics mean they are suitable for neurological treatments, as patients can be guided through a wide range of exercises and sensory experiences, as well as postural adjustments. This range also includes the models used in the unique C.I.R. - Continued Intensive Rehabilitation method. Finally, a special version also allows for use with static supine exercises without having to move a patient to a rehabilitation gym.

POSITIONS 3-4-5

Number and type of sections

This part of the code identifies the type of section. The main difference between models has to do with the number of sections and their dimensions, as well as with the posture that patients can put themselves in when using them.
Chinesport tables can have an electric or hydraulic height adjustment. The option with electric adjustment also has various drive types, depending on the number of electric actuators. This design choice was made for one of the most reliable electric actuators available on the market. The standard mains supply is 220V 50-60Hz and all drives work with very low safety voltage. Clients can make a specific request for 110V 50-60Hz supply and a non-SCHUKO plug. Some models can be powered by a 24V battery that come with a 110/220V 50-60Hz battery charger. The minimum protection rating for all electric components is IP 54.

A Electric, with foot switch
This type of control can be used to activate the electric height adjustment function. The foot switch is placed on the floor. The connection cable allows for complete freedom of movement.

B Electric, with perimeter foot switch
This is an electric height adjustment system that can be reached from anywhere around the table, without having to locate the foot switch. It is activated by simply pressing or lifting the perimeter bar.

C Hydraulic, with double foot switch
This hydraulic adjustment is ideal for situations where there is no power supply or when you need to move the table easily.
Electric, with hand control
Innovative ergonomic hand control with magnet. Users can attach it wherever they wish on the table frame. It comes with connection cable. The series Unix, Alux and Mini Top have a different hand control.

Electric, two motors with foot switch
It can be used with models that have two electric actuators, one for table height adjustment and one for the seat or backrest section.

Electric, two motors with hand control
This option has an ergonomic hand control with magnet that users can attach wherever they wish on the table frame. This is an alternative to the foot switch control for models that have two electric actuators, one for table height adjustment and one for the seat or backrest section.

Electric, with dual control
This is an alternative option for electric height adjustments. The control is securely placed in a special cradle, which can be attached at the base of the structure if so required by the user. The control can also be used as hand control, or attached to the table frame by using the magnet.

Electric with hand control and keypad
This option is exclusive to ALUX tables for beauty and massage. It is a dual electric adjustment for height and Trendelenburg / anti-Trendelenburg position. In particular, this configuration features a hand control plus another control panel on the base frame on both long sides.
Various additional options are available to configure our Chinesport tables after having chosen the height adjustment system and the type of drive. At the moment, we can add wheels to move the table easily, and safety siderails or armrests to provide greater comfort for the patient. These options can also be combined. We would be grateful if you could provide us with any preferred options by writing directly to our International Sales Department at the address export@chinesport.it.

1. **No options**
   When inserting the product configuration code, please specify if you are interested in any of the options available for position 7 of the code.

2. **With wheels for transportation**
   Swiveling, non-marking wheels with a central braking system activated via a single foot pedal. Moving the table is extremely comfortable and requires no effort. The table cannot be moved when a patient is lying on the table.

3. **Safety siderails**
   Siderails offer greater safety to patients while they are lying on the table, or when the professional needs to step away temporarily. They can be fitted as and when needed thanks to an easy manual mechanism.

4. **With wheels and safety siderails**
   Please indicate if you would like the table to be fitted with wheels and safety siderails, for greater patient safety. The wheels braking system is controlled by a single foot pedal.
5 Additional armrests
Padded supports are available in the same color as the upholstery of the chosen model. They can be rotated by 180° and moved by 12 cm. They are designed to achieve the patient postures also specified under the Global Postural Re-education method. (1)

6 With wheels and armrests
Here you can select to add wheels to the table configuration, in addition to the armrests that can rotate by 180°.

7 Compact safety siderails
These are alternative safety siderails that can be attached exclusively to the VISIT TRANSFER table. A characteristic of these siderails is that they can be attached or removed without adding any bulk at the sides.

(1) RPG Method - Global Postural Re-education Method
Giotto is a coated fire-resistant fabric. It is sturdy and easy to care, making it particularly suitable for use in hospitals, care homes, spas, rehabilitation centers and gyms. Giotto has a leather effect surface and shiny finish, and comes in a wide array of colors. Giotto contains Vynyzene, an anti-microbial that is added during the processing stages to create a protective barrier against dust mites, bacteria and fungi, preventing any bad odors and allergies.

**PADDING DENSITY AND DEPTH**

Chinesport normally uses a padding depth and density that is 40mm and 30kg/m³, except for the Bobath range. However, our Upholstery Department is able to deal with particular non-standard requests. In such cases, an additional charge may be applied.

**PANEL STABILITY**

Panels are secured to the frame by means of bushings. If required, these bushings can also be easily replaced when the padded section wears out or is damaged.
CHOOSING THE UPHOLSTERY COLOR:

Upon placing an order, please remember to specify the upholstery color code. Choose among a standard range of 24 colors.

A WHITE  N IVORY  8 BEIGE  7 ASHGREY  K GREY  S DARK BROWN

B CREAM  4 YELLOW  T GREEN LEMON  1 DARK GREEN  6 LIGHT GREEN  E AQUAMARINE

Z ORANGE  G CORAL  F RED  H BURGUNDY  9 FUCHSIA  Q LILAC

R LIGHT CORNFLOWER BLUE  2 LIGHT BLUE  3 MARINE BLUE  L DARK BLUE  M ANTHRACITE  P BLACK

02023 CLEANING SET

To clean and disinfect the padded synthetic leather surface of any examination and treatment table. The set includes 3 x 500 ml bottles. Another set of protection cream is included, 3 jars.

XCAT0020131 COLOR SAMPLES

Upon request from design companies or individual professionals who would like to check the actual synthetic leather color before making a purchase, we are happy to send our samples.
Postural cushions are available in various shapes and sizes to meet the professional’s varied requirements to position a patient correctly. Our cushions are made from variable density foam and have a synthetic leather cover which is fire-resistant and anti-bacterial, easy to clean and durable. Standard density is 21 kg/m³. Cushion covers have a zip for easy removal, and come in a choice of upholstery from an assortment of 24 color options. Cushions can be purchased in the same type of upholstery as the examination or therapy table.

**MADE-TO-MEASURE CUSHIONS**

On request, we can manufacture cushions with non-standard size and density.

Feel free to send us your request by e-mail to our address: export@chinesport.it

**KEY:** W = width; D = depth; H = height; all dimensions are in centimeters (cm).

**CHOICE OF UPHOLSTERY COLOR** - important: always specify the upholstery code along with the chosen item when this option is available.

01426 POSTURAL SET
This set includes 5 cushions, one for each type specified above, and a carry bag to store the items, size 33 x 33 x 56 h cm.
Accessories for height adjustable therapy tables

ELECTRICAL ACCESSORIES

AC0017 AUXILIARY BATTERY
Enables the table to be used without power supply. It can be attached to the table by plugging the battery cable directly into the actuator. The battery comes with a support so it can be secured to the frame base. Works for 10 height-adjustment cycles.

AC0037 ADDITIONAL FOOT PEDAL 1
For models fitted with a single motor. The additional foot pedal provides another way to control the table height adjustment. It can be used on both sides.

AC0038 ADDITIONAL FOOT PEDAL 2
For models fitted with two motors. The additional foot pedal provides another way to control the table height adjustment, as well as the motorized sections. This accessory can be used on both sides.

AC0039 ADDITIONAL HAND CONTROL 1
For models fitted with a single motor. The additional hand control provides another way to control the table height adjustment. This hand control has a magnet so it can be easily attached to the table frame, without any restrictions on the location.

AC0040 ADDITIONAL HAND CONTROL 2
For models fitted with two motors. The additional hand control provides another way to control the table height adjustment, as well as to adjust the motorized sections. This hand control has a magnet so it can be easily attached to the table frame, without any restrictions on the location.

AC0083 ADDITIONAL CONTROL 1
It can be used both as a foot pedal in combination with the corresponding holder, code AC0997, or as a hand control. It has a magnet that enables it to be attached anywhere on the frame.

AC0087 FOOT SWITCH HOLDER
Can be applied on either side of the base frame as preferred by the carer, and enables the accessory AC0083 to be fitted. Not compatible for therapy tables with perimeter footswitch (option B).

AC0578 SAFETY DEVICE
This device disconnects the mains supply from the height adjustment system. This stops any inappropriate use when the carer is away. The device consists of a manual switch.

AC0017 AUXILIARY BATTERY
Enables the table to be used without power supply. It can be attached to the table by plugging the battery cable directly into the actuator. The battery comes with a support so it can be secured to the frame base. Works for 10 height-adjustment cycles. Power supply: 1.2Ah 24V.
Accessories for height adjustable therapy tables

Made in Italy

FOR PROTECTION AND HYGIENE

AC0031 PAPER ROLL HOLDER F
A metal support with adjustable width from 50 cm to 65 cm that is attached to the upper part of the couch. Recommended for use with paper rolls from set AC0034. This support can be attached to the foot end of models from the Unix, Visit and Ther Series, or to the head end of models from the Test Series.

AC0699 PAPER ROLL HOLDER H
A metal support with adjustable width having similar characteristics to support AC0031, but designed to be attached only to the head end of models from the Unix, Visit and Test Series. In particular, for models from the Test Series it is compatible for use with push handle AC0698. Available for therapy tables in production from September 2015 only.

AC0032 PAPER ROLL HOLDER G
A metal support that is attached to the foot end of the couch base. It allows for the paper roll to be placed vertically if required. This support can be used with rolls that are up to 68 cm long. This support can be attached to the foot end of models from the Unix, Visit and Ther Series, or to the head end of models from the Sinthesi Series.

AC0034 STANDARD PAPER ROLL SET
The set includes 6 x 60 cm wide rolls. Each roll is 85 meters long.

AC0035 MAXI PAPER ROLL SET
The set includes 2 x 90 cm wide rolls. Each roll is 100 meters long.

AC0036 PROTECTIVE SHEET SET
This set contains 10 synthetic fabric sheets with elasticated border. This sheet can be used on any examination and treatment table.

PADDED SUPPORTS AND ELEMENTS

AC0020.W § BREATHING HOLE PLUG
For any examination, massage and treatment tables that provide for the option of a standard nose/mouth breathing hole. When ordering, please specify the chosen upholstery color (can be supplied individually).

AC0018.W § LATERAL ARMRESTS
They are used to extend the upper body section for larger individuals, or to improve comfort when positioning the arms. Length is 58 cm and width is 15 cm. (can be supplied in combination).

AC00313 DRIP STAND SUPPORT
To be used with the drip stand accessory code AC0027. It can only be attached to models from the VISIT series (can be supplied in combination).

AC0307 CYLINDER HOLDER
It can only be attached to model VISIT TRANSFER code LV351. It is fitted to the long side of the table base frame (can be supplied individually).

AC0021 RPG BAR FOR COUCH
This bar is height-adjustable and is fitted with a rope and strap AC0056. This bar can also be used for exercises from the RPG (Global Postural Re-education) method. It can be attached to couches from the THER Series and models UNIX 2, EVO UNIX 2, EVO UNIX PLUS.

AC0022 RPG WALL BAR
This bar has the same characteristics and intended use as accessory AC0021, i.e. it is meant for exercises from the RPG (Global Postural Re-education) method. It is attached to the wall and can therefore be used with any examination or therapy table.
Accessories for height adjustable therapy tables

**SPECIFIC ACCESSORIES FOR TEST SERIES**

**AC0026 FASTENING DEVICE**
This device can only be applied to models from the Test Series, 63 cm wide. It is used to configure the table/armchair with various types of armrests and other accessories.

**AC0028 ARMCHAIR ARMREST**
This armrest is made from thermoplastic material that can be easily disinfected. When fitted into the fastening device AC0026, it can be easily adjusted in height and rotation. It can be attached in a different position from the other side.

**AC0029 PHLEBOTOMY ARMREST**
This phlebotomy armrest is made from thermoplastic material that can be easily disinfected. When fitted into the fastening device AC0026, it can be easily adjusted in height and rotation. It can be attached in a different position from the other side.

**AC0027 DRIP STAND**
A chromed steel drip stand that is attached to models from the Visit Series. To be ordered together with the pair of supports accessory code AC0313. If attached to models from the Test series, please use the fastening device AC0026.

**AC0710.W ? PADDED ARMREST**
Padded, synthetic leather armrest for greater comfort. When fitted into the fastening device AC0026, it can be easily adjusted in height and rotation. Please select the upholstery color.

**AC0023.W ? CERVICAL CUSHION**
W 30 x D 15 x H 8,5

**AC0698 PUSH HANDLE**
It can only be applied to model Test Mobil code LE 211 to facilitate transportation when the patient is lying on the table.

**AC0545.W ? PLUG FOR GYNECOLOGICAL EXAMINATION TABLE**
This plug allows the table to be used for gynecological or urological purposes - ref. models LE151 or LE 351 - and the patient can either lie supine or prone. You can select a color that matches the couch upholstery, so please remember to specify the upholstery color along with the accessory code.

**CHOICE OF UPHOLSTERY COLOR** - important: always specify the upholstery color along with the chosen item when this option is available.
This is the classic range of examination and treatment tables consisting mainly of two sections, with a 68 cm-long head section that can be used as a backrest. The backrest can have positive and negative tilt adjustment: up to +70° /- 20°. Height is adjusted via one of the most reliable motors available on the market. A hydraulic version is also available as an alternative. The frame is unique for its simplicity and harmonious design, which is protected by registered Community design. Some of our tables are also available with larger wheels so they can be used to transport patients. This configuration can be completed by fitting a set of safety siderails.

“I bought a VISIT 1 couch four years ago and I use it several times a week. I had seen Chinesport couches in several hospital and really liked them. I am absolutely pleased not only with its features, but also because of the numerous positive comments that I receive from my patients, particularly the elderly ones, and for its ease of access. It allows me to do away with those inconvenient and dangerous steps.” Prof. Carlo Moreschi - Legal Medical Examiner (Udine - Italy)

PADDED SUPPORTS AND ELEMENTS:
AC0020.W? BREATHING HOLE PLUG
AC0313 DRIP STAND SUPPORTS
AC0027 DRIP STAND
CUSHIONS FOR POSTURE:
Refer to the first pages.
The quality of Chinesport products is the result of ongoing efforts for improvement and highest attention to detail. For example, the central braking system with one single, ergonomic foot switch control can be activated easily and noiselessly.
A major difference from the VISIT range is given by the head section length which is only 52 cm. For this reason, it cannot be used as a backrest, but it can be fitted with armrests to provide greater comfort for the patient when in prone position. These tables were developed for physiotherapy, osteopathy or for the so-called “Global Postural Re-education” method, and they can be configured with up to six sections to achieve different postural positions for the patient. There is also a model that can be arranged in a seated position for particular use in gynecology. Another difference from the VISIT range is that the head section has a greater tilt adjustment, i.e. positive tilt up to +85° and negative tilt up to -35°, plus the nose/mouth breathing hole is standard.

**TECHNICAL FEATURES**

- Number of sections: 3 / 5
- Max safety load (kg): 200
- Height adjustment: Electric / Hydraulic
- Minimum/maximum table height (cm): 47-97
- Mains supply: 220V 50-60Hz / 24V 70VA
- Actuator thrust (N): 6000
- IP Protection: 54
- Head section adjustment: Gas spring-assisted
- Head section tilt: +85° -35°
- Wheels diameter (mm): 65
- Braking system: Central
- Upholstery safety rating: 1 IM
- Padding thickness (mm): 40
- Density (kg/m³): 30
- Weight (kg): 82 / 84

For further information on options and accessories, please refer to the first pages.

Foot switch holder not compatible if perimeter footswitch (option B) is chosen
TherLine Therapy tables

Global Postural Re-education, more frequently identified with the acronym RPG, originates from the book “Le Champ Clos” (The Closed Field) written by Professor Ph. E. Souchard in 1981. The end goal of RPG is to globally restore the body’s static and dynamic balance after it had been compromised due to spontaneous defense mechanisms that were kick-started by external aggressions. The principle of RPG is based on postures involving an active muscular stretching. These postures tend to highlight the muscle tension chains in tendons and membranes around muscles (which lock the individual in an unbalanced position). These postures create an active elongation (active participation from the individual) and a subsequent relaxation of the muscle chains that were affected by spasm and stiffness. Unlike other types of treatment, these postures need a systematic, global approach in order to be effective. Special focus needs to be placed on breathing. There are countless benefits that can be felt in many areas: motor, static, digestive, circulatory, mental and emotional. An overall balance requires the respiratory muscles, and particularly the diaphragm, to work efficiently.

The therapy table THER PLUS GLOBAL allows us to correctly perform the various postures used in the Global Postural Re-education method. In particular, the two lateral armrests can be turned by up to 180° and moved by 12 cm.
This range is an alternative to the classic ranges called VISIT and THER used for examinations, treatments and physiotherapy. In particular, the distinguishing feature in these tables is that height adjustment occurs while the individual sections remaining completely motionless. This makes them particularly suitable for smaller environments or to make the best use of available space, as well as to maintain the position chosen for exercises once the pulley therapy system has been set up. You can opt for a simplified base frame and configure the head section with a backrest that is 68 cm long, instead of a smaller, 52 cm long section that can come with armrests. The second type of head section can have positive and negative tilt adjustment: up to +85°/ -35°.

Our Sinthesi couches allow therapists to effortlessly place patients in countless myofascial stretching postures that can be easily maintained for longer periods of time and without strain. In this relaxed position, various techniques can be applied to facilitate recovery in myofascial elongation, increase joint movement range and achieve an antalgic posture as a relief from acute pain. Also, Sinthesi tables provide the ideal starting position for exercises to stimulate central activation and for isometric muscular work.

Learning objectives:

Participants shall learn how myofascial structures adapt to poor postures in order to economize on movements and avoid pain in the joint movement range. A global postural analysis through GPS enables therapists to identify which groups are requiring treatment in order to regain appropriate posture and movement.

This course shall demonstrate how Sinthesi treatment tables have become an integral part of postural training and treatment for many therapists. With 8 independently mobile sections and uninterrupted, noiseless functions of movement control, therapists can offer a new and unique range of myofascial treatments that provide an efficient and effective treatment for many disorders.

Our Sinthesi tables allow therapists to effortlessly place patients in countless myofascial stretching postures that can be easily maintained for longer periods of time and without strain. In this relaxed position, various techniques can be applied to facilitate recovery in myofascial elongation, increase joint movement range and achieve an antalgic posture as a relief from acute pain. Also, Sinthesi tables provide the ideal starting position for exercises to stimulate central activation and for isometric muscular work.

The myofascial release techniques course is now available worldwide from Chinesport. It is the ideal starting point for trainee practitioners striving to improve their skills. Participants will learn how to use the unique MIto - Sinthesi therapy table within a global approach towards myofascial therapy, with the aim to restore the natural myofascial length and improve posture and movement.

01778
MANUAL FOR MI.TO. TREATMENT TABLE
This document was developed by its author with the aim to offer useful therapeutic indications through the use of a special therapy table for active and passive treatments via postural exercises. Special emphasis is given to respiratory training, awareness of the vertebral column function, mobilization exercises, muscle stretching, decompression of discs and fractions, strengthening and stabilization of the rachis, manual treatment for conditions (e.g. spondyloarthrosis, lumbosciatica due to hernia, painful scoliosis, hyperkyphosis) and application in sporting activities. Author Dr. Francesco Mignani; in Italian/English; Size 15 x 21; Pages 30

“Interpreting and understanding any dysfunctional mechanisms caused by a change in the balance of the body unit leads us to consider how important it is to regain such balance, by working on restoring harmony in muscle chains, on the principles of their functional system and their potential correlations (ascending, descending or mixed). . . .”

“If one or more elements, whether internal or external, interfere with this harmony, our body tries to maintain balance by putting the lack of pain first. In order not to suffer pain, our body bends, extends, tilts, reduces its mobility and tries to seek comfort through these defensive adaptations that are certainly less economical. Unfortunately, this leads to significant energy loss particularly for myofascial structures.”

(excerpt from manual)
Feedback on MI.TO. Therapy Tables

Prof. Benedetto Toso, Posturology Lecturer at the Faculty of Motor Sciences of the Università Cattolica del Sacro Cuore in Milan, Founder and President of the Back School Association.

“The MI.TO therapy table is a useful tool for professionals so muscle stretching exercises can be performed effectively and by each muscle group, avoiding any potential compensation. Also, in the event of acute lumbago, it enables the patient to passively get into an antalgic posture that helps to re-balance the rachis group and reduce pain. All these features make it a precious tool to have both in physical therapy practices and gyms. The only limitation (which is not in fact a limitation but an advantage) is that you will need to have more than one therapy table in your gym as it helps patients to perform numerous exercises in the most appropriate way”.

Dr. Francesco Mignani, with a degree in Physiotherapy, specialized in Osteopathy, Motor Sciences teacher, massage therapist and physiotherapist, Director of the Centro Fisioprogect in Santa Maria degli Angeli (Assisi), Italy

- Our MI.TO postural table is a multi-functional tool both for direct manual treatments and within a wider postural rehabilitation approach.
- Manipulation and posture, posture and manipulation – this interaction is now possible with our MI.TO postural table.
- Our MI.TO postural table facilitates the therapist’s work by giving continuity to manual treatments, as it also provides great help to perform postural exercises.
- When there is a disorder, the body’s overall organization needs a combination of strategies that our MI.TO postural table is able to address with its multiple functions.
- Caring for the individual as a whole and addressing any complex issues now has an additional tool: the MI.TO postural table.
Large physical therapy tables that are up to two meters long and have a surface area measuring four square meters. The size and stability characteristics mean they are suitable for neurological treatments, as patients can be guided through a wide range of exercises and sensory experiences, as well as postural adjustments. This range also includes the models used in the unique R.I.C. - Continued Intensive Rehabilitation method. Finally, a special version also allows for use with static supine exercises without having to move a patient to a rehabilitation gym.

Bobath Line for supine positions and treatments

Fitting the footplate assembly for use in supine standers

1) Note: A special safety device is available for different height or tilt adjustment.

2) Note: An additional safety system is available to lower the table manually in the event of power failure.

This model was designed to help professionals and patients in gym rehabilitation programs, avoiding any waste of time and discomfort during transfers from one type of treatment table to the other.

EXAMPLES OF ACCESSORY APPLICATIONS

Foot restraining sandals accessory AC0002 (2 pieces)

Strap guide accessory AC0312 (single piece)

Leg separator accessory AC0311 (single piece)

Lateral trunk supports accessory AC0003 (2 pieces)

Hand grips accessory AC0004 (2 pieces)

Work table for static exercises in supine position accessory AC0308 (single piece)
This is a range of multi-functional tables for examination and for specific treatments. In particular, they can be used in podiatry, gynecology, urology, cardiology, geriatrics, beauty, phlebotomy or even to transport patients within care facilities. The table height can be adjusted electrically or via hydraulic piston, while the moving sections are servo-assisted by gas spring. In some versions, the seating section is tilt-adjustable via another motor. As a result, these tables can easily change into a seated, relaxation, Trendelenburg and anti-Trendelenburg position even with the patient lying on the table. A series of accessories is also available for specified uses.

For example, this picture shows one configuration that includes the following accessories:

ACO026 FASTENING DEVICE N. 2 PIECES
ACO028 ARMCHAIR ARMREST N. 2 PIECES
For all Test Series examination, treatment or postural tables, the possible configurations can be integrated by special accessories that are designed for particular uses. The key component for attaching these accessories is a chromed steel fastening device that can be fitted in various positions on both sides of the seat section. Each fastening device code AC0026 allows for attaching one single accessory at a time, which can then be adjusted in height, rotation and tilt.

**AC0026 FASTENING DEVICE**
Made from chromed steel (can be supplied individually).

**AC0027 DRIP STAND**
Made from chromed steel.

**AC0028 ARMCHAIR ARMREST**
Made from polyurethane, can be supplied individually.

**AC0710.W? PADDED ARMREST**
Made from polyurethane, can be supplied individually.

**AC0029 PHLEBOTOMY ARMREST**
Made from polyurethane, can be supplied individually.

For further information on options and accessories, please refer to the first pages.
**Phlebotomy Couch**

This multifunctional couch is identified by code LE 311 D2W6 and it has two motors; height is adjusted electrically by means of a hand control fitted with a magnet. The backrest and leg rest sections can be adjusted via a system that is servo-assisted by gas springs and convenient levers, while the seat section is easily adjusted by means of another motor. This couch has several positions: seated, relaxation, Trendelenburg and anti-Trendelenburg. Includes wheels.

The configuration can also include the following accessories when used for phlebotomy:

- **AC0026 FASTENING DEVICE** n. 3 Pieces
- **AC0028 ARMCHAIR ARMREST** n. 1 Piece
- **AC0029 PHLEBOTOMY ARMREST** n. 1 Piece
- **AC0027 DRIP STAND** n. 1 Piece

Model shown is LE 311 D2 W6

---

**Armchair/Couch and Transport Couch**

This model has two motors; height is adjusted electrically by means of a hand control fitted with a magnet. The backrest and leg rest sections can be adjusted via a system that is servo-assisted by gas springs and convenient levers, while the seat section is easily adjusted by means of another motor. This couch has several positions: seated, relaxation, Trendelenburg and anti-Trendelenburg. Includes wheels. It is useful for patients who cannot stand up and move by themselves, who require long-term care, are bedridden for a long period of time or live in care homes, as it can help them reach the desired height to be then transferred horizontally and come to a seated position while the patient is still lying on the table, and finally be helped to move by a carer.

- **AC0026 FASTENING DEVICE** n. 2 Pieces
- **AC0028 ARMCHAIR ARMREST** n. 2 Pieces
- **AC0698 PUSH HANDLE** n. 1 Piece

Model shown is LE 211 D1 W4

---

**Gynecological examination table**

Our gynecological and urological examination table has three mobile sections and can have one or two motors for height adjustment and, if required, to adjust the seat section and adjust the tilt angle, with the patient lying on the table and without any strain. This examination table can be adjusted into several positions, starting from sitting at a lower height which makes it easier for the patient to climb on. The sections are adjusted by gas springs and ergonomic levers.

THese models come with two padded thigh supports, that can be height-adjusted and rotated, and a stainless steel removable bowl as standard supply.

**Configuration example for a treatment table from the VISIT range.**

---

**Video QR Code**
With this range, Chinesport is branching out into beauty, spa and massage tables for the first time, and introduces some additional optional features such as the sections heated at three different temperatures and the synthetic leather upholstery that covers the sides to produce a softer padding effect on the contact surface. Among other noteworthy options, there is a possibility to choose a LED lights configuration for combining chromotherapy effects. This is why this model comes with more identification codes than any other height-adjustable table, and even when there is only one option of section width or padding density/thickness clients can request personalized features and options. These tables have two motors, so they can achieve the Trendelenburg and anti-Trendelenburg position via a dual telescopic column system.
**POSITION 4 - Adjusting the head section**

1. **Head section without armrests, adjustable by gas spring** with lever control. This section can be tilted up to +70°.

2. **Head section without armrests, adjustable by electric motor** with hand control with magnet. This section can be tilted up to +70°.

3. **Head section with armrests, adjustable by gas spring** with lever control. This section can be tilted up to +70°.

4. **Head section with armrests, adjustable by electric motor** with hand control with magnet. This section can be tilted up to +70°.

**POSITION 5 - Adjusting the legs-trunk sections**

1. **Combined trunk-leg section.** Only one section for trunk and legs which can be adjusted by an electric motor in positive or negative tilt +/- 12°.

2. **Movable sections, adjustable by gas spring** - Two movable sections obtaining a relax position, they are adjustable by gas strut with lever control. It is possible to adjust the tilt of all sections together +/− 12°.

3. **Movable sections, adjustable by electric motor** - Two movable sections obtaining a relax position, they are adjustable by electric motor with magnet. It is possible to adjust the tilt of all sections together +/− 12°.

**POSITION 6 - Adjusting the frame in height**

1. **With hand control**
   The adjustment is done by means of a hand control with magnet;

2. **With hand control on both sides**
   This option includes not only the magnet control by hand, but also a fix control on both sides.
**POSITION 7 - Transferring wheels and led illumination**

This table can be provided with retractable wheels with centralized brake system lever activation. The wheels enable easy transferring without person lying on it.

1. Without wheels, without led illumination
2. With transferring wheels
8. With led illumination
9. With wheels, with led illumination

The ALUX therapy table is available with led illumination with a possible combination of 640,000 colours. Intensity can be programmed up to 20 ways of illumination by means of a specific wireless control. These lights can provide chromotherapy effects, and they help make the table become harmonically integrated in the place where it is.

**POSITION 8, 9, 10, 11 - Width, density and thickness**

The width of the sections is of cm 75 standard, while the padding is mm 50 minimum with a 30 kg/m³ density. Our upholstering center can make personalizations, after verifying the feasibility. In such cases an adjustment of the price would be done.

75 cm
Standard width cm 75
Thickmess mm 50,
Density 30 kg/m³

**POSITION 12 - Heating**

For a greater comfort during treatment it is possible to set the bed with a heating function of the sections. Thus, the sections will always be warm and pleasant at touch for a more relaxing experience.

A. Padded sections without heating
B. Padded sections with heating

**POSITION 13 - Breathing hole**

1. Head section without breathing hole
2. Head section with breathing hole

**POSITION 14, 15 - Synthetic leather finishing and upholstery colours**

The sections are made with a side band which makes padding softer. The type of synthetic leather is Giotto type collection. 24 colours of upholstery are available.

Upon request from design companies or individual professionals who would like to check the actual synthetic leather color before making a purchase, we are happy to send our samples.

An overview on the main features of this new Chinesport special table for aesthetic treatments.

? CHOICE OF UPHOLSTERY COLOR - important: always specify the upholstery code along with the chosen item when this option is available
Examination or treatment tables with a sturdy metal or wooden frame; dimensions and number of segments vary but typically have fixed height. However, some models can be height-adjusted manually to pre-determined positions, while others can be folded. The section upholstery has rounded edges, which allows patients to come closer, while the head section can be ordered in the version with nose & mouth breathing hole. These tables can be used in doctor’s surgeries, for example. The MINITOP range is a recent addition to this group and is a basic model for examinations only, with two sections that can be adjusted electrically and a very simplified design.
Accessories for basic tables

FOR PROTECTION AND HYGIENE

AC0031 PAPER ROLL HOLDER F
A metal support with adjustable width from 50 cm to 65 cm that is attached to the upper part of a couch. Recommended for use with paper rolls from set AC0034. This holder can be attached to basic tables on either side, head or foot.

AC0034 STANDARD PAPER ROLL SET
The set includes 6 x 60 cm wide rolls. Each roll is 85 meters long.

AC0287 CLASSIC PAPER ROLL HOLDER
This holder can only be attached to the head section of ALUX and MINITOP models and can only be used with paper rolls that are up to 61 cm wide.

Y740 ROLL HOLDER
This metal frame holds the paper rolls used on examination, massage and treatment tables and can be easily moved.

AC0035 MAXI PAPER ROLL SET
The set includes 2 x 90 cm wide rolls. Each roll is 100 meters long.

AC0036 PROTECTIVE SHEET SET
This set contains 10 synthetic fabric sheets with elasticated border. This sheet can be used on any examination and treatment table. Not compatible with couches larger than cm 100 or more.

SUPPORTS AND UPHOLSTERY

AC0020.W NOSE/MOUTH BREATHEING HOLE PLUG
For treatment tables that provide for the option of a standard nose/mouth breathing hole.

12269 HEADREST
Tilt-adjustable cervical cushion that can be fitted on all basic treatment tables using a special frame. Available only in gray. Not compatible with couches larger than cm 100 or more.

12270 ARMREST
This support helps to release the load from arms and can be ordered together with the headrest code 12269. Available only in gray. Not compatible with couches larger than cm 100 or more.

Same features of model code 11860, but with width 70 cm. Weight 19 kg.

**ACCESSORIES**

**11864 TRANSPORT BAG 56**
Transport protection cover suitable for foldable therapy table featured by width 56 cm.

**11867 TRANSPORT BAG 70**
Transport protection cover suitable for foldable therapy table featured by width 70 cm.
CUSHIONS FOR POSTURE

Postural cushions are available in various shapes and sizes to meet the professional’s varied requirements to position a patient correctly. Our cushions are made from variable density foam and have a synthetic leather cover which is fire-resistant and anti-bacterial, easy to clean and durable. Standard density is 21 kg/m³. Cushion covers have a zip for easy removal, and come in a choice of upholstery from an assortment of 24 color options.

Please refer to the first pages of this section for further details.
We have a range of padded stools in various shapes that can be chosen by the professional among several options. Our stools can also be made in the same upholstery color as the Chinesport therapy tables, so there are 24 colors to choose from. Below is an interior design solution for medical and physical therapy practices including a series of items and accessories such as wooden stools, chairs, office chairs, screens, medical equipment trolleys. The step plates with one or two steps make it easier for patients to be transferred onto fixed height therapy tables.
CUSTOM STOOLS

Series of swivel stools with five swivel wheels and 60 cm diameter base. Height is adjusted by means of a gas spring mechanism and lever. Models come with two different height adjustment mechanisms. Our stools are manufactured using materials that ensure excellent seat stability over time. Bushings are also used to attach the seat to the frame, which allows for parts to be easily replaced when worn out or if the padding gets damaged, or even if you just want a new upholstery color. A wide choice of upholstery colors is available. 3-year guarantee.

Pos. 4 Synthetic leather design
